COMSRG - Comm. Surge Protector

H23

ETA Line

Overview

In some applications, the transient protection on the communications terminals of DDC controllers is inadequate. Examples are roof mounted air handlers, pad mounted air conditioners or chillers – or anything attached to the building’s HVAC system but outside the building envelope.

BAPI’s COMSRG provides the extra muscle necessary to prevent damage. The COMSRG plugs between the communications network and any of BAPI’s RS-485 communication products, including COMBLK, COMBLK2, TUCOM, TUCOM2, LRCA, RPTR, RBP4, RBP8, RBP-PB, RBP-CX, RBP-CX2, and SRBP.
